Meerdaalwoud

The Meerdaalwoud is a green oasis just 3 kilometres from lively Leuven. Here you find not only the largest deciduous forest in Flanders, but also a wealth of natural wonders. The Meerdaalwoud is situated at the transition of sandy loam and loamy soils. The difference in altitude created a varied forest with a wide variety of trees and shrubs. Some beech and oak trees are more than 300 years old and have a trunk circumference of more than 5 metres.

And there is more. Imagine: deer, a majestic sight in this forest since time immemorial, their graceful movements forming a silent dance that brings the forest to life. It is like stepping back in time, where nature rules and the animals are in charge.

For the bird watchers among us, the Meerdaalwoud is a true paradise. Three different species of woodpecker - the little, middle and great spotted woodpecker - drum their own rhythms here, as if they are setting the heartbeat of the forest.

And then there are the silent giants: the centuries-old beeches and oaks, whose stories are as deeply rooted as they are themselves. Walking under their canopy, you feel the echoes of times gone by.

So, what are you waiting for? Put on your walking shoes, fill your lungs with the pure forest air and let your senses be enchanted by the magic of the Meerdaalwoud. A place where you leave the hectic pace of everyday life behind and the whispers of nature take you on an adventure.

TASTE THE NATURE

Flemish Brabant, a beer paradise, is home to numerous breweries and blending houses. These craftsmen cherish the centuries-old traditions of lambic brewing and geuze blending. Lambic, unique for its brewing process and spontaneous fermentation in wooden barrels, is a beer you will not find anywhere else in the world. Lambic is also used as a base to make the better-known geuze and kriek beers.

Go there and make sure that you taste these special brews for yourself.

Here are a few suggestions:

LINDEMANS BREWERY

The Lindemans family started a lambic brewery in Vlezenbeek as long ago as 1809. This went so well that the family closed the farm to concentrate on brewing. Today, Lindemans still brews lambic as the basis for numerous authentic and innovative beers.

TIMMERMANS BREWERY

The brewery was founded in 1702, making it one of the oldest lambic breweries in the country. You can enjoy lambic, geuze and faro as well as fruit beers such as kriek, peach and raspberry.

ANGERIK BREWERY

This brewery makes only high-fermentation beers from Belgian hops and malt. It does so using an old method: the different parts of the brewing installation are placed on top of each other. No pumps are needed, gravity does the work.

DE TROCH BREWERY

As with many lambic breweries, the origins of De Troch brewery lie in a farmhouse, in 1795. The installation is virtually unchanged and it is a gem of archaeological industry.

BOON BREWERY

The first traces of what is now called Boon Brewery can be traced back to 1680. The brewery is one of the few to work using the 'cloudy wort' method, also known as the 'slime' method. This is the oldest traditional brewing method for lambic beer.

OUD-BEERSEL BREWERY

Oud Beersel brewery has been brewing lambic beers according to the time-honoured tradition since 1882. Here they brew Oude Geuze and Oud Beersel, which was voted the world's best Lambic/Geuze beer. The blonde triple, Bersalis, is also worth a try.

MORT SUBITE BREWERY

Lover of a delicious geuze or kriek beer? Then a visit to Mort Subite brewery is not one to miss. The brewery belongs to the select group of breweries that produce geuze in an artisanal manner.

GEUZE BLENDERY DE CAM

In Geuze blendery De Cam, an old Dutch word for brewery, lambic from artisanal geuze breweries is re-fermented into smooth, authentic geuze. The beer matures in 100-year-old oak barrels. The history of De Cam dates back to at least the early 18th century.

BEER CENTRE DE LAMBIEK

'De Lambiek' in Beersel is the world's first visitors' centre for Geuze and Lambic beers. During your visit, you learn about these local products and their producers using all your senses. You learn about the brewing process, with all its secrets, and find out how important these beers are for the region.
